CUSTOMER-CENTRIC INNOVATIVE SOLUTIONS

CYBERSECURITY

CYBERSECURITY CHALLENGES

HOW AITHERAS SOLVES THEM

STRATEGY WEAKNESSES

Strategies fail to efficiently address collective risks and weaknesses in all areas including emerging technologies, workforce management, and malware.

We develop and execute a comprehensive strategy that mitigates global supply chain risks, addresses cybersecurity workforce management challenges, and ensures the security of emerging technologies.

REACTIONARY PROCESSES

Since events, alerts and issues are solved in a reactionary manner today, it is often difficult for agencies to get ahead of emerging threats.

We utilize an SSAE-18 compliant data center from which we operate a Security Operation Center (SOC). This gives you 24/7/365 Real-time security monitoring, alerting, and response. We conduct risk assessments, threat protection, and vulnerability scans and assessments.

SLOW ACQUISITIONS

Because of the necessary due diligence, vetting and bidding it means that even critical security upgrades could take 12-18 months.

Our highly skilled security experts possess impressive backgrounds in government contracting, program and project management, information and personnel security, risk and vulnerability assessments, and national and international security operations management, to save you time.

OUR SERVICES AND PRODUCTS

MANAGED SECURITY SERVICES

- Continuous Security Monitoring
- Log Management
- Intrusion Prevention & Detection
- Managed Firewall Vulnerability Remediation

RISK ASSESSMENT

- Penetration Testing
- Vulnerability Assessments
- Audit and Compliance

INDUSTRY-SPECIFIC SECURITY SERVICES

- HIPAA Compliance and Testing
- SSAE 18 Audit Preparation
- SCADA Implementation
- HIPAA and PCI Compliance Services

THREAT PROTECTION

- Threat Intel
- Security Awareness Training
- DDoS Testing and Mitigation
- Data Loss Prevention

INCIDENT MANAGEMENT

- Incident Response
- Forensic Analysis
- Malware Reverse Engineering
