

# DATA ANALYTICS

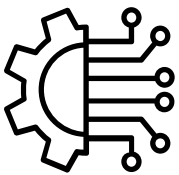

## WHY ITS NEEDED

Collecting information from across your organization and industry gives you the advantage of seeing where improvements are needed, identifying trends for opportunities, providing a deeper understanding of implications, making critical decisions, and building it into a process. Without analyzing important data you are essentially flying blind in many areas, which can delay or sabotage progress. AITHERAS offers a full range of services to ensure that our customers attain the maximum value from their investment in data analytics by employing quick, productive, and cost efficient consulting and analytic project development..

## HOW AITHERAS HELPS

**Determining how to get value from your data** – We work closely with you, collaborating to understand your business issues, and we effectively leverage data and modeling to solve your challenges, providing professional training as requested..

**Integrating multiple data-sources** – Combining data from multiple sources into a single, unified view enhances communication, creates better collaboration, improves access to important information, provides a real-time view of performance, and protects you from data loss. We use predictive analytics to help businesses automate, improve, and combine decisions across various, and sometimes disparate, parts of an organization.

**Defining data strategy** – A data strategy helps by ensuring that data is managed and used efficiently. It provides a common set of goals, methods, processes, and practices across projects to manage, manipulate and share data across the organization in a repeatable manner.

**Risk and Governance issues** - Data governance is routed in people, places, and technology. The potential for a loss related to your data affects all these areas when failures occur in the storage, use, transmission, management and security of data. We are adept at helping our clients meet current and future data challenges.

# CONTRACT VEHICLES

**DEPARTMENT OF JUSTICE DATA ANALYTICS SOLUTION BPA  
GS-35F-494GA**

**GSA SCHEDULE CONTRACT IT 70-GS-35F-0068S**
